MESSAGE/APPEAL

My Dear Students, Teaching and Non-Teaching staff members

As you all are aware that the whole world including India is passing through an unprecedented crisis created by the spread of COVID-19 Pandemic. So far India has been able to contain it but now it is spreading and if its spread is not checked now situation may go out of hands. All of us together have to Join hands with our Hon'ble Prime Minister Shri Narendra Modi Ji and take every precaution to protect ourselves, our families and thereby others from this deadly virus.

I request you all, not to get panicky and abide by all the directions given by our government and not trust the rumors. As of now there is no treatment of this virus and the only way to prevent it is through taking precautions. Therefore, you have to follow social distancing, remain confined to your house and not to go out unless compelled by emergency. Give highest consideration to hygiene and wash your hands time and again. Take healthy diet, do Yoga at home, keep yourself busy and take care of your physical and mental health.

“**Safety Saves**” is the mantra, we need to follow in this critical situation.

With best wishes,

(**R.K. Mittal**)
