**INTRODUCTION**

Pursuing passions not only help in warding off stress arising out of academic pressures but also prove fulfilling. If passion pursued persistently it will pave a way towards self-actualisation. Traditional teaching - learning process is centred on number crunching career and students are not usually encouraged to make a mark for themselves. At present having reached a stage where survival needs have been ensured for all, opportune time has arrived that students should have freedom to live their dreams with passion. Pursuing a passion while studying will infuse a sense of purpose in life along with inducing inspiration and initiatives in youth. When a student acquires a sense of purpose in life, it will balance out all other things which are energy sapping or boring.

## OBJECTIVES

1. To harness the unique inherent potential of each student to the optimum level.
2. To insulate the students from undesirable influences arising out of the forces of market, modernisation and technology.
3. To promote pattern of values, belief systems and behaviour enshrined in our culture.
4. To strengthen the bond between the teacher and the taught.
5. To evolve a coherent system of instruction based on the interests, aptitude and abilities of the students. To make the teaching-learning process more student centric & friendly and make students independent learner.
6. To provide opportunity to the students to add creative contents while building up their career.
7. To enrich the environment of educational institutions with opportunities for divergent thinking and learning opportunities.
