

CH. BANSI LAL UNIVERSITY, BHIWANI, HARYANA

Scheme of Examination for Under-Graduate Programmes

Skill Enhancement Courses (SEC)

(w.e.f. 2025-26)

(Computer Science)

Offered by Department of Information and Communication Technology

According to

Curriculum Framework for Under-Graduate Programmes

As per NEP-2020

(Multiple Entry-Exit, Internships and Choice Based Credit System)

Scheme of Examination for Undergraduate Programmes

Skill Enhancement Courses (Computer Science)

According to Curriculum Framework for Undergraduate Programmes as per NEP 2020

(Multiple Entry-Exit, Internships and Choice Based Credit System)

Max.Marks:70(50(T)+20(P)) InternalAssessmentMarks:20(15(T)+5(P)) EndTermExamMarks:50(35(T)+15(P))		Time:3Hrs.(T),3Hrs.(P)	
PartB-ContentsoftheCourse			
<u>InstructionsforPaper-Setter</u> Examiner will set a total of nine questions. Out of which first question will be compulsory.Remaining eight questions will be set from four unit selecting two questions from each unit.Examination will be of three-hour duration. All questions will carry equal marks. First questionwillcomprise ofshort answer typequestions coveringentiresyllabus.			

Candidate will have to attempt five questions in all, selecting one question from each unit. First question will be compulsory. Practicum will be evaluated by an external and an internal examiner. Examination will be of three-hour duration.		
Unit	Topics	Contact Hours
I	Introduction to Computer: Computer and Latest IT gadgets, Evolution of Computers & its applications, Basics of Hardware and Software, Application Software, Systems Software, Utility Software. Central Processing Unit, Input devices, Output devices, Computer Memory & storage, Mobile Apps.	6
II	Introduction to Operating System, Functions of the Operating system, Operating Systems for Desktop and Laptop, Operating Systems for Mobile Phone and Tablets, User Interface for Desktop and Laptop, Task Bar, Icons & shortcuts, Running an Application, Operating System Simple Setting, Changing System Date and Time, Changing Display Properties, To Add or Remove Program and Features, Adding, Removing & Sharing Printers, File and Folder Management.	6
III	Introduction to Internet and World Wide Web, Basic of Computer Networks, Local Area Network (LAN), Wide Area Network (WAN), Network Topology, Internet, Applications of Internet, Website Address and URL, Popular Web Browsers (Internet Explorer/Edge, Chrome, Mozilla Firefox, Opera etc.), Popular Search Engines, Searching on the Internet.	6
IV	E-mail: Using E-mails, Opening Email account, Mailbox: Inbox and Outbox, Creating and Sending a new E-mail, replying to an E-mail message, forwarding an E-mail message, searching emails, Attaching files with email, Email Signature. Social Networking: Facebook, Twitter, LinkedIn, Instagram, Instant Messaging (WhatsApp, Facebook Messenger, Telegram), Introduction to Blogs, Digital Locker.	6
V*	Practicum: - Identify the various parts of computer - Using computer/mobile software and hardware - Use of operating system for various tasks such as file creation, directory creation, shortcut creation, using control panel, etc. - Using Internet & various browsers. - Identify the various hardware/software required for Internet - How to create and use e-mail account - Using Facebook, WhatsApp, Instagram, LinkedIn, Telegram - Writing blogs	25
Suggested Evaluation Methods

Unit	Topics	Contact Hours
I	Keywords and Identifiers; Comments: Purpose/use of comments, Singlelinecomment/Multilinecomment; Python Variables: Declaration of Variables, Assign Values to Variables, Initialization, Reading, Variable naming restrictions, and Types of Python Variables. Python Data Types: Implicit Declaration of Data Types, Python Numbers (Integers, floating-point numbers, and complex numbers), Python Strings, Python Boolean datatype;	6
II	Operators: Arithmetic, Comparison/Relational Operators, Increment Operators, Logical operators, Identity Operators, and Operators Precedence. Python Control Flow Statement, Decision Making: Simple If Structure, if-else structure, if elif structure, and nested If Structure;	6
III	Looping: Python Loop Statements. Python while loop, Python for loop, Python range(), Python Nested Loop Structures, and Inserting conditions in Loops and vice versa; Python Branching Statements – break, continue, pass. Python Lists: Create Python Lists, Update Python Lists, Delete Elements from Python Lists, and Built-in Functions Methods for Python Lists.	6
IV	Tuples: create, update, join and methods; Sets: create, add/remove items, join sets, set methods; Dictionary: create, access, add/remove items, dictionary methods. Manipulating Strings: Working with Strings, Useful String Methods Python Functions: defining function, arbitrary arguments, keywords arguments, default parameter values, return value and return statements; Lambda; Arrays: looping through array elements, array methods;	7
V*	Students are advised to do laboratory/practical practice not limited to, but including the following types of problems: • Write a program to compute distance between two points taking input from the user (Pythagorean Theorem). • Write a program add.py that takes 2 numbers as command line arguments and prints its sum. • Write a Program for checking whether the given number is an even number or not. • Using for loop, write a program that prints out the decimal equivalents of 1/2, 1/3, 1/4, ..1/10. • Create a list and perform the following methods (a) insert() (b) remove() (c) append() (d) len() (e) pop() (f) clear() • Create a dictionary and apply the following methods: (a) Print the dictionary items (b) access items	25

	(c)useget()(d)changevalues(e)uselen() • Create tuple and perform the following methods: (a) Add items (b) len() (c) check for item in tuple (d) Access items • Write a python program to print a number is positive/negative using if-else. • Write a python program to find largest number among three numbers. • Write a python Program to read a number and display corresponding day using if _elif _else? • Write a program to create a menu with the following options: (a) TOPERFORM ADDITION (b) TOPERFORM SUBTRACTION (c) TOPERFORM MULTIPLICATION (d) TOPERFORM DIVISION • Accepts user's input and perform the operation accordingly. Use functions with arguments. • Write a python program to check whether the given string is a palindrome or not. • Write a python program to find factorial of a given number using functions • Write a Python function that takes two lists and returns True if they are equal otherwise false. • Demonstrate a python code to print try, except and finally blocks statements. • Write a Python script that prints prime numbers less than 20. • Write a python program to find factorial of a number.	
Suggested Evaluation Methods		
Internal Assessment: ➤ Theory • Class Participation: 4 • Seminar/presentation/assignment/quiz/class test etc.: 4 • Mid-Term Exam: 7 ➤ Practicum • Class Participation: 2 • Seminar/Demonstration/Viva-voce/Lab record setc.: 3 • Mid-Term Exam: NA	End Term Examination: A three hour exam for both theory and practicum.

Unit	Topics	Contact Hours
I	WWW and E-Governance - Website Address and URL, Introduction to IP, Address, ISP and Role of ISP, Internet Protocol, Modes of Connecting Internet (HotSpot, Wifi, LAN Cable, BroadBand, USB Tethering), Identifying and uses of IP/MAC/IMEI of various devices, Downloading Web Pages, Printing Web Pages Introduction to Blogs, Basics of E-commerce, Netiquettes, Overview of Governance Services like Railway Reservation, Passport, eHospital [ORS], Accessing Governance Services on Mobile	5
II	Digital Financial Tools and Applications Digital Financial Tools, Understanding OTP [One Time Password] and QR [Quick Response] Code, UPI [Unified Payment Interface], AEPS [Aadhaar Enabled Payment System], USSD [Unstructured Supplementary Service Data], Card [Credit / Debit], eWallet, PoS [Point of Sale], Internet Banking, National Electronic Fund Transfer (NEFT), Real Time Gross Settlement (RTGS), Immediate Payment Service (IMPS), Online Bill Payment	5
III	Cyber Security: Cyber Security, Defining Cyberspace, Architecture of cyberspace, Regulation of cyberspace, Concept of cyber security, Issues and challenges of cyber security. Classification of cyber crimes, Common cyber crimes - cyber crime targeting computers and mobiles, cyber crime against women and children, financial frauds, social engineering attacks, malware and ransomware attacks, zero day and zero click attacks, Cyber criminals modus-operandi, Reporting of cyber crimes, Remedial and mitigation measures, Legal perspective of cyber crime, IT Act 2000 and its amendments, Cyber crime and offences, Organisations dealing with Cyber crime and Cyber security in India.	7
IV	Overview of Future skills: Introduction to Internet of Things (IoT), Big Data Analytics, Cloud Computing, Virtual Reality, Artificial Intelligence, Social & Mobile, Blockchain Technology, 3D Printing/Additive Manufacturing, Robotics Process Automation.	7
V*	Practicum: WWW and E-Governance: - Understanding the various devices related to Internet - Using e-governance services - Writing e-blogs. Digital Financial Tool: - Using digital financial tools. Cyber Security: - Checklist for reporting cyber-crime at Cyber crime Police Station - Checklist for reporting cyber crime online - Reporting phishing emails	25

	- Demonstration of email phishing attack and preventive measures. Futuristic Technology: - Introducing various futuristic technologies.	
Suggested Evaluation Methods		
Internal Assessment: ➤ Theory - Class Participation: 4 - Seminar/presentation/assignment/quiz/class test etc.: 4 - Mid-Term Exam: 7 ➤ Practicum - Class Participation: 2 - Seminar/Demonstration/Viva-voce/Lab record setc.: 3 - Mid-Term Exam: NA		End Term Examination: A three hour exam for both theory and practicum.
Part C-Learning Resources		
Recommended Books/e-resources/LMS: - Cyber Crime Impact in the New Millennium, by R. C Mishra, Author Press. Edition 2010. - Cyber Security Understanding Cyber Crimes, Computer Forensics and Legal Perspectives by Sumit Belapure and Nina Godbole, Wiley India Pvt. Ltd. (First Edition, 2011) - Security in the Digital Age: Social Media Security Threats and Vulnerabilities by Henry A. Oliver, CreateSpace Independent Publishing Platform. (Pearson, 13th November, 2001) - Electronic Commerce by Elias M. Awad, Prentice Hall of India Pvt Ltd. - Computer Fundamentals-By Pradeep K. Sinha, Priti Sinha, BPB Publications, 6th Edition		

*Applicable for courses having practical component.

Unit	Topics	Contact Hours
I	Manage Workbook Options and Settings: Create Worksheets and Workbooks, navigate in Worksheets and Workbooks, Format Worksheets and Workbooks, Customize Options and Views for Worksheets and Workbooks, Configure Worksheets and Workbooks for Distribution Apply Custom Data Formats and Layouts: Apply Custom Data Formats and Validation, Apply Advanced Conditional Formatting and Filtering, Create and Modify Custom Workbook Elements	6
II	Create Tables: Create and Manage Tables, Manage Table Styles and Options, Filter and Sort a Table Perform Operations with Formulas and Functions: Summarize Data by using Functions, Perform Conditional Operations by using Functions, Format and Modify Text by using Functions.	6
III	Create Charts and Objects: Create Charts, Format Charts, Insert and Format Objects Manage Workbook Options and Settings: Manage Workbooks, Manage Workbook Review Restrict editing	6
IV	Create Advanced Formulas: Apply Functions in Formulas, Look up data by using Functions, Apply Advanced Date and Time Functions, Perform Data Analysis and Business Intelligence, Define Named Ranges and Objects, Create Advanced Charts and Tables: Create and Manage Pivot Tables, Create and Manage Pivot Charts	6
V*	Practicum: Spread Sheet: • Uses spreadsheet for basic data handling • Apply formulas to sheet for automation. • Use if-else to make certain decisions in a sheet. • Use Charts & Shapes for better visualization of data. • Use filters and data validation controls for control of data • Formatting data and spreadsheets • Creating and managing tables • Use Pivot table and charts • Use what-if analysis along with goal seek and scenarios	25

Unit	Topics	Contact Hours
I	Database Management System – Introduction and Purpose, Database Architectures: Centralised, Client-Server, Parallel, Distributed, Web based system: Web architecture (2 tier, 3 tier, N-tier Architecture) Database Storage Structures: Introduction, Indexing, Hashing, Data Dictionary.	6
II	Data Models: Introduction to various data models, Cardinality Ratio & Relationships, Representation of entities, attributes, relationship attributes, relationship set, Generalization, aggregation, Structure of relational Database and different types of keys, Codd's rules and Relational data model	6
III	Relational Database design: Basic System Development Life Cycle, Database Design – ER to Relational, Functional dependencies, Normalization, Normal forms based on primary keys (1NF, 2NF, 3NF)	6
IV	SQL queries: SQL data definition, data types, specifying constraints, Queries for retrieval, insertion, deletion, updation, introduction to views.	6
V*	Practicum: Create and use the following database schema to answer the given queries. EMPLOYEE Schema: Field Type NULL KEY DEFAULT Ename Varchar(50) NO Job Varchar(50) NO Manager Char(3) Yes FK Hire_date Date NO Dno Integer YES FK Commission Decimal(10,2) YES Salary Decimal(7,2) NO DEPARTMENT Schema: Field Type NULL KEY DEFAULT Dname Varchar(50) Yes Location Varchar(50) Yes New Delhi Query List 1. Query to display Employee Name, Job, Hire Date, Employee Number; for each employee with the Employee Number appearing first. 2. Query to display unique Jobs from the Employee Table. 3. Query to display the Employee Name concatenated by a Job separated by a comma.	25

4. Query to display all the data from the Employee Table. Separate each Column by a comma and name the said column as THE_OUTPUT. 5. Query to display the Employee Name and Salary of all the employees earning more than \$2850. 6. Query to display Employee Name and Department Number for the Employee No=7900. 7. Query to display Employee Name and Salary for all employees whose salary is not in the range of \$1500 and \$2850. 8. Query to display Employee Name and Department No. of all the employees in Dept 10 and Dept 30 in the alphabetical order by name. 9. Query to display Name and Hire Date of every Employee who was hired in 1981. 10. Query to display Name and Job of all employees who do not have a current Manager. 11. Query to display the Name, Salary and Commission for all the employees who earn commission. 12. Sort the data in descending order of Salary and Commission. 13. Query to display Name of all the employees where the third letter of their name is „A“. 14. Query to display Name of all employees either have two „R“ or have two „A“s in their name and are either in Dept No = 30 or their Manager's Employee No=7788. 15. Query to display Name, Salary and Commission for all employees whose Commission amount is 14 greater than their Salary increased by 5%. 16. Query to display the Current Date. 17. Query to display Name, Hire Date and Salary Review Date which is the 1st Monday after six months of employment. 18. Query to display Name and calculate the number of months between today and the date each employee was hired. 19. Query to display the following for each employee earns <Salary> monthly but wants < 3*Current Salary>. Label the Column as Dream Salary. 20. Query to display Name with the 1st letter capitalized and all other letters lowercase and length of their name of all the employees whose name starts with „J“, „A“ and „M“. 21. Query to display Name, Hire Date and Day of the week on which the employee started. 22. Query to display Name, Department Name and Department No for all the employees. 23. Query to display Unique Listing of all Jobs that are in Department #30. 24. Query to display Name, Dept Name of all employees who have an „A“ in their name. 25. Query to display Name, Job, Department No. And Department Name for all the employees working at the Dallas location. 26. Query to display Name and Employee no. Along with their Manager's Name and the Manager's employee no; along with the Employees' Name who do not have a Manager. 27. Query to display Name, Dept No. And Salary of any employee whose department No. and salary matches both the department no. And the salary of any employee who earns a	
---	--

	commission.	
--	-------------	--

	28. Query to display Name and Salaries represented by asterisks, where each asterisk (*) signifies \$100. 29. Query to display the Highest, Lowest, Sum and Average Salaries of all the employees 30. Query to display the number of employees performing the same Job type functions. 31. Query to display the no. of managers without listing their names. 32. Query to display the Department Name, Location Name, No. of Employees and the average salary for all employees in that department. 33. Query to display Name and Hire Date for all employees in the same dept. as Blake. 34. Query to display the Employee No. and Name for all employees who earn more than the average salary. 35. Query to display Employee Number and Name for all employees who work in a department with any employee whose name contains a, T". 36. Query to display the names and salaries of all employees who report to King. 37. Query to display the department no, name and job for all employees in the Sales department	
Suggested Evaluation Methods		
Internal Assessment: ➤ Theory • Class Participation: 4 • Seminar/presentation/assignment/quiz/class test etc.: 4 • Mid-Term Exam: 7 ➤ Practicum • Class Participation: 2 • Seminar/Demonstration/Viva-voce/Lab record setc.: 3 • Mid-Term Exam: NA	End Term Examination: A three hour exam for both theory and practicum.

Part B- Contents of the Course			
<u>Instructions for Paper-Setter</u> Practicum will be evaluated by an external and an internal examiner. Examination will be of three- hour duration.			

Unit	Topics	Contact Hours
	Web Programming Introduction: Architecture of a website, Different technologies in making the website; Introduction to HTML: History of HTML, Basic structure of an HTML document, Introduction to Static and Dynamic Websites, HTML Tags vs Element, HTML Attributes; HTML-Basic Formatting Tags; Grouping Using Div and Span, HTML-Lists: Unordered Lists, Ordered Lists, Definition list; Image and Image Mapping, Hyperlink.	60
	HTML-Table: < table >, <th>, <tr>, < td >, < caption >, <thead>, <tbody>, <tfoot>, <colgroup>, <col>; Colspan & Rowspan HTML-Iframe: Iframe attributes, Using Iframe as the Target; HTML-Form: Form attributes, Form elements:< input>, <textarea>.<button>,<select>,<label>,<fieldset>, <legend>etc.	
	CSS: Introduction, Benefits of CSS, CSS Syntax, Types of CSS, CSS Selectors: Element selector, ID Selectors, Class Selectors, Grouping Selectors, Universal Selector, CSS-Pseudo Classes, pseudo element; Text Fonts: color, background-color, text-decoration, text-align, vertical-align, text-indent, text-transform, white space, letter-spacing, word-spacing, line-height; font properties: font-family, font-size, font-style, font-variant, font-weight.	
	Lists: list-style-type, list-style-position, list-style-image, list-style Tables: border, width & height, text-align, padding, colour; CSS Box Model: Border, Margin & Padding, width & height; CSS Positioning properties : Static Positioning, Fixed Positioning, Relative Positioning, Absolute Positioning.	
	Practicum Web Designing: - Starting with introduction to WWW HTML: - Write a HTML document to print "Hello World" in bold and Italic Format. - Design a page having suitable background color and text color with title "My First Web Page" using all the attributes of the Font tag. - Write HTML code to design a page containing some text in a paragraph by giving suitable heading style. - Write HTML code to display three images at LEFT, RIGHT and CENTER respectively in web browser. - Write HTML code which contains Hyperlinks. - Program based on HTML form and frames - Design a HTML table with the use of colspan and row	

	span. CSS: • Practical based on CSS

Session:2025-26			
Part A-Introduction			
Subject	COMPUTERSCIENCE		
Semester	4		
Name of the Course	Analytics with Python		
Course Code	24UN-ICT-VAC402		
Course Type:(CC/MCC/MDC/CC-M/DSEC/VOC/DSE/PC/AEC/VAC)	VAC		
Course Learning Outcomes(CLO):	After completing this course, the learner will be able to: 1. Learn basic statistics needed for data analytics 2. Use data analysis tools in the pandas library. 3. Load, clean ,transform, merge and reshapedata. 4. Create informative visualization and summarize datasets.		
Credits	Theory	Practical	Total
	--	2	2
Contact Hours	--	4	4
Part B- Contents of the Course			
<u>Instructions for Paper-Setter</u> Practicum will be evaluated by an external and an internal examiner. Examination will be of three- hour duration.			

	Topics	Contact Hours
	Introduction to basic statistics and analysis: Fundamentals of Data Analysis, Statistical foundations for Data Analysis, Types of data, Descriptive Statistics, Python Libraries: NumPy, Pandas, Matplotlib Correlation and covariance, Linear Regression, Statistical Hypothesis Generation and Testing Array manipulation using NumPy: NumPy array: Creating NumPy arrays, various data types of NumPy arrays, Indexing and slicing, swapping axes, transposing arrays, data processing using Numpy arrays Data Manipulation using Pandas: Data Structures in Pandas: Series, Data Frame, Index objects, loading data into Panda's data frame, Working with DataFrames: Arithmetic, Statistics, Binning, Indexing, Reindexing, Filtering, Handling missing data, Hierarchical indexing, Data wrangling: Data cleaning, transforming, merging and reshaping Plotting and Visualization: Using Matplotlib to plot data: figures, subplots, markings, color and line styles, labels and legends, Plotting functions in Pandas: Lines, bar, Scatter plots, histograms, stacked bars, Heatmap	60
	Practical List: Use data set of your choice from Open Data Portal(https://data.gov.in/) for the following exercises, wherever data set are not mentioned explicitly. 1. Make visual representations of data using library Matplotlib and apply basic principles of data graphics to create rich analytic graphs for available data sets. 2. Use boston house-prices dataset available with sklearn library to do the following for: i. Generate box whisker plots for price and age of the owner ii. Identify outliers, if any iii. Display 5-point summary of data distribution for all attributes iv. Find if there is any missing value in data or not v. Find pair wise correlation between attributes vi. Use scatter plot to show relationship between each feature w.r.t target class in a single panel for comparison 3. Create a CSV file having employee data records. Each employee record has three features viz. age, home city and salary. Import employee file and: i. Draw scatter plot for age vs salary ii. Plot histogram for features age and salary iii. Plot Pie chart for the qualitative attribute city iv. Generate box plots for salary and age 4. Import iris data using sklearn library to: i. Compute mean, mode, median, standard deviation, confidence interval and standard error for each feature ii. Compute correlation between length and width of sepal feature	

iii. Find covariance between length of sepal and petal iv. Build contingency table for class feature 5. Download datasets Hepatitis and automobile from UCI repository i. Find the number of records which are noise free ii. Clean data after removing noise iii. Normalize quantitative features in range of [0,1] iv. Compare frequency distribution for any two columns by plotting histograms for any two columns in the same plot 6. Do the following using iris CSV file (use of Pandas/NumPy/SciPy) i. Find total number of records and columns in CSV file ii. Find correlation and contingency table for any two variables iii. Find the column with maximum variance iv. Draw scatter plot for any two columns and also write their correlation in the caption of scatter plot 7. Use car dataset from UCI repository (https://archive.ics.uci.edu/ml/machine-learning-databases/car/) i. Find the most popular car and draw appropriate plot to justify your answer ii. Plot bar chart to compare capacity of any two cars along with their cost iii. Draw word cloud for car names and export to a file
