

52

Chaudhary Bansi Lal University, Prem Nagar, Bhiwani
Scheme of Examination for the Zoology Subject in Under-Graduate Programme
Under Multiple Entry-Exit, Internship and CBCS-LOCF in accordance to NEP-2020
w.e.f. 2024-25 (In a phased manner)

SEMESTER-1									
Applicable Scheme	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Scheme A & C	CC-1 MCC-1 4 credit	24UN-ZOO-101	Animal Diversity of Non-Chordates	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Scheme C only	MCC-2 4 credit	24UN-ZOO-102	Type study of Non-chordates	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Scheme A	CC-M1 2 credit	24UN-ZOO-103	Introduction of Non-Chordates	1	1	10	20	30	3 hrs.
			Practical	1	2	5	15	20	4 hrs.
Scheme A & C	MDC-1 3 credit	24UN-ZOO-MDC104	Basics of Zoology-I	2	2	15	35	50	3 hrs.
			Practical	1	2	5	15	20	4 hrs.
SEMESTER-2									
Applicable Scheme	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Scheme A & C	CC-2 MCC-3 4 credit	24UN-ZOO-201	Animal Diversity of Chordates	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Scheme C only	SEC-1 4 credit	24UN-ZOO-SEC202	Applied Zoology	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Scheme A only	CC-M2 2 credit	24UN-ZOO-203	Introduction of Chordates	1	1	10	20	30	3 hrs.
			Practical	1	2	5	15	20	4 hrs.
Scheme A & C	MDC-2 3 credit	24UN-ZOO-MDC204	Basics of Zoology-II	2	2	15	35	50	3 hrs.
			Practical	1	2	5	15	20	4 hrs.

51
10

SEMESTER-3

Applicable Scheme	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Scheme A, B & C	CC-3 MCC-4 4 credit	24UN-ZOO-301	Cell Biology and Animal Genetics	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Scheme B & C	MCC-5 4 credit	24UN-ZOO-302	Type study of Chordates	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Scheme A, B & C	MDC-3 3 credit	24UN-ZOO- MDC303	Basics of Zoology-III	2	2	15	35	50	3 hrs.
			Practical	1	2	5	15	20	4 hrs.

SEMESTER-4

Applicable Scheme	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Scheme A, B & C	CC-4 MCC-6 4 credit	24UN-ZOO-401	Biomolecules and Mammalian Physiology	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Scheme B & C	MCC-7 4 credit	24UN-ZOO-402	Aquaculture	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Scheme B & C	MCC-8 4 credit	24UN-ZOO-403	Pest Management	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Scheme B & C	DSE-I 4 credit Select one option	24UN-ZOO-404	Biodiversity and Wildlife Management	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
		24UN-ZOO-405	Cytogenetics	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.

[Handwritten signatures]

SEMESTER-5

Applicable Scheme	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Scheme A, B & C	CC-5 MCC-9 4 credit	24UN-ZOO-501	Ecology and Environment	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Scheme B & C	MCC-10 4 credit	24UN-ZOO-502	Animal Taxonomy	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Scheme B & C	DSE-2 4 credit Select one Option	24UN-ZOO-503	Animal Behaviour and Chronobiology	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
		24UN-ZOO-504	Comparative Anatomy of Vertebrates	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Scheme B & C	DSE-3 4 credit Select one Option	24UN-ZOO-505	Biology of Insects	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
		24UN-ZOO-506	Parasitology	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.

SEMESTER-6

Applicable Scheme	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Scheme A, B & C	CC-6 MCC-11 4 credit	24UN-ZOO-601	Developmental Biology & Evolution	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Scheme B & C	MCC-12 4 credit	24UN-ZOO-602	Basics of Endocrinology and Immunology	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Scheme B & C	DSE-4 4 credit Select one Option	24UN-ZOO-603	Reproductive Physiology	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
		24UN-ZOO-604	Neurophysiology	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Scheme B & C	DSE-5 4 credit Select one Option	24UN-ZOO-605	Molecular Biology	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
		24UN-ZOO-606	Forensic Biology	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.

Handwritten signatures and marks at the bottom of the page.

SEMESTER-7 (FOR HONOURS/HONOURS WITH RESEARCH IN ZOOLOGY)

Applicable Scheme	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Honours in Zoology with Research in Zoology	CC-H1 4 credit	24UN-ZOO-701	Advances of Cell Biology	4	4	30	70	100	3 hrs.
	CC-H12 4 credit	24UN-ZOO-702	Biochemistry and Bio-techniques	4	4	30	70	100	3 hrs.
	CC-H13 4 credit	24UN-ZOO-703	Structure and Function of Invertebrates	4	4	30	70	100	3 hrs.
	DSE-H11 1 credit Select one Option	24UN-ZOO-704	Biosystematics and Biostatistics	4	4	30	70	100	3 hrs.
		24UN-ZOO-705	Computational Biology	4	4	30	70	100	3 hrs.
	PC-H11 4 credit	24UN-ZOO-706	Practical Based on 24UN-ZOO-701 TO 704/705	4	8	30	70	100	6 hrs.

SEMESTER-8 (FOR HONOURS IN ZOOLOGY)

Applicable Scheme	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Honours in Zoology	CC-H14 4 credit	24UN-ZOO-801	Structure and Function of Vertebrates	4	4	30	70	100	3 hrs.
	CC-H15 4 credit	24UN-ZOO-802	Comparative Physiology	4	4	30	70	100	3 hrs.
	CC-H16 4 credit	24UN-ZOO-803	Population Genetics & Evolution	4	4	30	70	100	3 hrs.
	DSE-H12 1 credit Select one option	24UN-ZOO-804	Population and Community Ecology	4	4	30	70	100	3 hrs.
		24UN-ZOO-805	Environment and Public Health	4	4	30	70	100	3 hrs.
	PC-H12 4 credit	24UN-ZOO-806	Practical Based on 24UN-ZOO-801 TO 804/805	4	8	30	70	100	6 hrs.

OR SEMESTER-8 (FOR HONOURS WITH RESEARCH IN ZOOLOGY)

Applicable Scheme	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Honours with Research in Zoology	CC-H14 4 credit	24UN-ZOO-801	Structure and Function of Vertebrates	4	4	30	70	100	3 hrs.
	CC-H15 4 credit	24UN-ZOO-802	Comparative Physiology	4	4	30	70	100	3 hrs.
	Project/Dissertation 12 credit	24UN-ZOO-807	Project/Dissertation	8+4	-	-	-	-	-

ZOOLOGY:SEMESTER-5

Remarks	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Scheme A, B & C	CC-5 MCC-9 4 credit	24UN-ZOO-501	Ecology and Environment	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Level of the course: 200-299									
Pre-requisite for the course (if any): Biology as a Subject at 4.0 Level (Class XII)									
Course Learning Outcomes (CLO) 1. Students will be able to describe interactions and relation between abiotic and biotic factors. 2. Students will be able to describe about ecosystem and Biogeochemical cycles. 3. Students will be able to describe about population characteristics & biodiversity. 4. Students will be able to understand the causes of different types of pollution. 5. Students will be able to practical approaches of natural resources and their conservation.									
Instructions for Paper-Setter 1. Nine questions will be set in all. All questions will carry equal marks. 2. Question No.1, which will be short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more questions selecting one question from each unit.									
UNIT	TOPICS								CONTACT HOURS
I	Basic concepts of Ecology: Definition, significance. Concepts of habitat and ecological Niche. Ecosystem: Concept, components, properties and functions; Ecological energetics and energy flow models, food chain, food web, trophic structure; ecological pyramids, concept of productivity.								12
II	Factors affecting Environment: Abiotic factors (light-intensity, quality and duration), temperature, humidity, wind, Rainfall, topography; edaphic factors; Biotic factors. Introduction to major ecosystems of the world. Biogeochemical cycles: Concept, reservoir pool, gaseous cycles (C, N, O ₂ , H ₂ O) and sedimentary cycles (P & S). Community Ecology: Characteristics, Composition, structure, origin and development of a community Ecological Succession.								11
III	Population: Growth and regulation. Population interactions: Competition, Predation, Parasitism, Commensalisms, Amensalism and Mutualism. Concept of biodiversity and conservation of natural resources.								11
IV	Climate change: Global warming, Greenhouse Effect, Ozone Depletion, Sustainable Development. Natural Recourses: Types, Uses and conservation. Environmental Pollution: Air, water, soil, Noise and their management strategies. Environmental Impact Assessment.								11
V Practical	1. Chemical analysis of pond water (pH, Salinity, free CO ₂ , alkalinity, hardness) 2. Chemical analysis of soil for pH, moisture, nitrates, and phosphates. 3. Estimation of DO, BOD for given Sample of water.								30

The bottom of the page contains several handwritten signatures and dates in blue ink. On the left, there is a signature 'Islam' dated '08/07/25'. In the center, there is a signature 'Zhang' and another signature dated 'July 31/25'. On the right, there is a signature 'Saur' dated '3/7/25'. There are also some other smaller, less legible marks and initials scattered around.

4. A study of pond ecosystem.
5. Basic Zooplankton & Phytoplankton study of any water body.

Suggested Evaluation Methods

Internal Assessment:

> Theory

- Class Participation: 5
- Seminar/presentation/assignment/quiz/class test etc.: 5
- Mid-Term Exam: 10

> Practical

- Class Participation: NA
- Seminar/Demonstration/Viva-voce/Lab record etc.: 10
- Mid-Term Exam: NA

End Term Examination:

> Theory

Written Examination: 50

> Practical

Practical Examination: 20

Learning Resources

ZOOLOGY: SEMESTER-5

Remarks	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Scheme B & C	MCC-10 4 credit	24UN-ZOO-502	Animal Taxonomy	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.

Level of the course: 200-299

Pre-requisite for the course (if any): Biology as a Subject at 4.0 Level (Class XII)

Course Learning Outcomes (CLO)

1. Students will be able to attain knowledge of taxonomy which helps in classifying and identifying biodiversity
2. Students will understand animal relationships by making phylogenetic trees.
3. It will enhance the knowledge of students to understand the overall biodiversity of the world and their application.
4. Students will be able to acquire, analyze and understand the significance of Biosystematics
5. Students will be able to learn the practical knowledge of general organization, affinities and systematic position of animals.

Instructions for Paper-Setter

1. Nine questions will be set in all. All questions will carry equal marks.
2. Question No. 1, which will be short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more questions selecting one question from each unit.

UNIT	TOPICS	CONTACT HOURS
I	Fundamental concept of Taxonomy Introduction to taxonomy: Stages of Taxonomy, objectives of biological classification, Importance and application of biosystematics in Zoology, principles and rules of taxonomy, ICZN regulation.	12
II	Historical perspectives of biosystematics: Taxonomic stages: alpha, beta and Gamma taxonomy, Taxonomic Hierarchy, Taxonomic characters, Neo taxonomy and difference with classical taxonomy.	11
III	Taxonomic procedure Study methods: Collection, preservation and identification, evaluation of taxonomic characters, morphological, embryological, cytogenetical, biochemical, numeral components of classification. Importance of studying taxonomic with demerits	11
IV	Concept of speciation Varieties, subspecies, siblings, species and races. Concept of taxon, holotype, paratype, topotype. Molecular basis of taxonomy Phylogenetic: principle. Concept and applications.	11
V Practical	1. Demonstration for the preparation and use of different types of taxonomic keys. 2. Construction of cladogram, dendrograms and phylograms. 3. Construction of dichotomous key. 4. Classify different animal kingdom upto order. 5. Study of museum specimens and slides with emphasis on evolutionary and adaptive significance. 6. Software used to study animal taxonomy.	30

Interim Assessment: ➤ Theory • Class Participation:5 • Seminar/presentation/assignment/quiz/class test etc.:5 • Mid-Term Exam:10 ➤ Practical • Class Participation: NA • Seminar/Demonstration/Viva-voce/Lab record etc.:10 • Mid-Term Exam: NA	End Term Examination: ➤ Theory - Written Examination: 50 ➤ Practical - Practical Examination:20
Learning Resources

ZOOLOGY: SEMESTER 5

Remarks	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Scheme B & C	DSE-2 4 credit Select one Option	24UN-ZOO-503	Animal Behaviour and Chronobiology	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.

Level of the course: 200-299

Pre-requisite for the course (if any): Biology as a Subject at 4.0 Level (Class XII)

Course Learning Outcomes (CLO)

1. Students will be able to describe origin of animal behavior and its perception with environment.
2. Students will be able to describe biological clock and concepts of learning.
3. Students will be able to describe different types of social behavior in animals
4. Students will be able to describe effects of various stimuli on animal behavior.
5. Students will be able to describe to understand how animal behavior plays a key role to in interaction the biotic and abiotic world.

Instructions for Paper-Setter

1. Nine questions will be set in all. All questions will carry equal marks.
2. Question No.1, which will be short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more questions selecting one question from each unit.

UNIT	TOPICS	CONTACT HOURS
I	Concept of Animal Behaviour; Mile-Stones in the history of animal behaviour and scope. Stereotyped and acquired behavior patterns: Tropisms, Taxes, Reflexes, Instincts, learning & reasoning; Perception of the environment: Mechanical, Electrical, chemical, olfactory, auditory, visual	12
II	Social behaviour: Aggregations and society; Advantages of group living; Types of social organization in animals, Group selection, kin selection, altruism, reciprocal altruism, Territoriality. Social behaviour of termites, ants and primates. Concept of learning: law of learning, types of learning – Habituation, trial & error learning, latent learning, Insight, Imprinting, Classical conditioning & Instrumental learning. Concept of Migratory behavior	11
III	Behaviour Ecology: Habitat selection, Various means of communication in animals: Chemical, Visual, auditory, touch etc. Hormones and animal Behaviour: Hormones important to behavioral regulation; Genetic basis of behavior Aggressive behaviour; sexual attraction and sexual behaviour. Pheromones and animal behaviour: types of pheromones, role of Pheromones in animal behaviour; pheromones of social insects.	11
IV	Chronobiology: Introduction to Chronobiology; Various terminology used in chronobiology; Biological Rhythms and Biological clocks; Types of biological rhythms: Lunar rhythms, circadian rhythms; Circannual rhythms; Epicycles, Tidal rhythms, Sleep Disorders, Insomnia, chronotherapy.	11
V Practical	1. To study nests and nesting habits of the birds and social insects. 2. To study the behavioural responses of woodlice to dry and humid conditions. 3. To study geotaxis behaviour in earthworm.	30

[Signature]

[Signature]

5
[Signature]

[Signature]
3/7/25

[Signature]
3/7/25

4. To study the photo taxis behaviour in insect larvae.
5. Visit to Forest/Wildlife Sanctuary/Biodiversity Park/Zoological Park to study behavioural activities of animals and prepare a short report.
6. Study of actogram construction of locomotor activity of suitable animal models.
7. Study of circadian functions in humans (daily eating, sleep and temperature patterns).

Suggested Evaluation Methods

Internal Assessment:

> Theory

- Class Participation: 5
- Seminar/presentation/assignment/quiz/class test etc.: 5
- Mid-Term Exam: 10

> Practical

- Class Participation: NA
- Seminar/Demonstration/Viva-voce/Lab record etc.: 10
- Mid-Term Exam: NA

ZOOLOGY: SEMESTER 5

Remarks	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Scheme B & C	DSE-2 4 credit Select one Option	24UN-ZOO-504	Comparative Anatomy of Vertebrates	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.

Level of the course: 200-299

Pre-requisite for the course (if any): Biology as a Subject at 4.0 Level (Class XII)

Course Learning Outcomes (CLO)

1. The student will be able to identify and understand comparative anatomical structure of vertebrate organ systems
2. The learner will be able to understand the evolution of various organs and systems in the vertebrate body according to its environment
3. The student will be able to understand the plasticity of organ systems to adapt to the environment and acquire different novel forms
4. The student will be able to enhance the Ability to understand the anatomical organization of organs and systems in representative species
5. Students will be able to describe to understand practical approaches of anatomical systems invertebrates.

Instructions for Paper-Setter

1. Nine questions will be set in all. All questions will carry equal marks.
2. Question No.1, which will be short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more questions selecting one question from each unit.

UNIT	TOPICS	CONTACT HOURS
I	Integumentary and Skeletal System Structure, functions and various derivatives (hard and soft) of integuments of vertebrates Overview of axial and appendicular skeleton, Jaw suspensorium, Visceral arches	12
II	Digestive and Urinogenital System Alimentary canal and associated glands, dentition Succession of kidney, Evolution of Urinogenital ducts, Types of mammalian uteri	11
III	Respiratory and Circulatory System External and internal respiration, respiratory organ (Skin, gills, lungs and air sacs); respiratory pigments, Blood components, General plan of circulation, evolution of heart and aortic arches	11
IV	Nervous System and Sense Organs Comparative account of brain, Autonomic nervous system, Spinal cord, Cranial nerves in mammals, Classification of receptors, olfactory receptors, Brief account of visual and auditory receptors In Man	11
V Practical	1. Study of placoid, cycloid and ctenoid scales through permanent slides/photographs 2. Comparative study on skeleton of Frog, Varanus, Fowl, Rabbit 3. Study on Different types of Feathers, Scales and Hair. 4. Mammalian skulls: One herbivorous and one carnivorous animal 5. Study of rat arterial and Urinogenital system (demonstration/online videos) 6. Study of structure of any two organs (heart, lung, kidney, eye and ear) from online video/manuals.	30

ZOOLOGY:SEMESTER 5

Remarks	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Scheme B & C	DSE-3 4 credit Select one Option	24UN-ZOO-505	Biology of Insects	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.

Level of the course: 200-299

Pre-requisite for the course (if any): Biology as a Subject at 4.0 Level (Class XII)

Course Learning Outcomes (CLO): Students will be able to:

1. Attain as old foundation in insect biology, including general entomology, basic systematic, morphology, physiology, and biodiversity.
2. Understand evolution and biodiversity generation through macro- and micro-evolutionary processes, including how these processes have formed and diversified insects.
3. Develop an understanding of the distributions and abundances of organisms including insects, and their interactions with each other and the environment.
4. Gain appreciation of insects in society and human affairs, and as model systems in insect biology.
5. Develop the ability to design and perform a scientific study on insects, and to analyze results.

Instructions for Paper-Setter:

1. Nine questions will be set in all. All questions will carry equal marks.
2. Question No. 1, which will be short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise. Selecting two questions from each Unit I to IV. The candidate will be required to attempt question No.1 and four more questions selecting one question from each unit.

UNIT	TOPICS	CONTACT HOURS
I	Introduction Diversity and General Features of Insects Distribution, origin and Success of Insects on the Earth Economic importance of Insects	12
II	Insect Taxonomy Basis of insect classification; Classification of insects up to orders Insects as plant pests, with special reference to Wheat and Paddy Insects as mechanical and Biological vectors, Brief discussion on house flies and mosquitoes as important insect vectors	11
III	General Morphology of Insects External Features; Head-Eyes, Types of antennae, Mouth parts with respect to feeding habits, Thorax: Wings and wing articulation, Types of Legs adapted to diverse habitat Abdominal appendages and genitalia	11
IV	Physiology of Insects Structure and physiology of Insect body systems - Integumentary, digestive, excretory, circulatory, respiratory, endocrine, reproductive, and nervous system; Sensory receptors; Growth and metamorphosis Insect Societies, Group of social insects and their social life, Social organization and social Behaviour (Termites)	11

3 May

31/5/25

31/5/25

V Practical	1. Study of one specimen from each insect order 2. Study of different kinds of antennae, legs and mouth parts of insects 3. Study of head and sclerites of any one insect 4. Study of insect wings and their venation. 5. Study of insect spiracles 6. Methodology of collection, preservation and identification of insects. 7. Morphological studies of various castes of Apis. 8. Study of any three insect pests and their damages. 9. Study of any three beneficial insects and their products. 10. Field study of insects and submission of a project report on the insect diversity.	30
----------------	--	----

Suggested Evaluation Methods		
Internal Assessment: > Theory • Class Participation: 5 • Seminar/presentation/assignment/quiz/class test etc.: 5 • Mid-Term Exam: 10 > Practical • Class Participation: NA • Seminar/Demonstration/Viva-voce/Lab record etc.: 10 • Mid-Term Exam: NA	End Term Examination: > Theory - Written Examination: 50 > Practical - Practical Examination: 20	
Learning Resources		
1. A general text book of entomology. Imms, A. D., Chapman & Hall, UK 2. The Insects: Structure and function, Chapman, R. F., Cambridge University Press, UK 3. Principles of Insect Morphology, Snodgrass, R. E., Cornell Univ. Press, USA 4. Introduction to the study of insects, Borror, D. J., Triplehorn, C. A., and Johnson, N. F., Mac Saunders College Publication, USA 5. The Insect Societies, Wilson, E. O., Harvard Univ. Press, UK 6. Physiological system in insects, Klowden, M. J., Academic Press, USA 7. ZOOLOGY: SEMESTER-5

Remarks	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Scheme B & C	DSE-3 4 credit Select one Option	24UN-ZOO-506	Parasitology	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.

Level of the course: 200-299

Pre-requisite for the course (if any): Biology as a Subject at 4.0 Level (Class XII)

Course Learning Outcomes (CLO): Students will be able to:

1. Demonstrate detailed knowledge and understanding of the biology, life cycles, pathogenesis, diagnosis of parasitic infections in humans and their relevance for human health and strategies for control.
2. Demonstrate detailed knowledge and understanding of the biology and strategies for control of the vectors and intermediate hosts of human parasites.
3. Carry out practical laboratory identification of the various parasite stages both free and in tissues and diagnose infections.
4. Demonstrate specialized skills acquired through taking modules on: advanced diagnostic, molecular, immunological, genetic, chemotherapeutic, and ecological and/or control aspects of the subject.
5. Demonstrate the laboratory or field based research project, apply relevant research skills, critically analyze and interpret data, and work with minimal supervision.

Instructions for Paper-Setter

1. Nine questions will be set in all. All questions will carry equal marks.
2. Question No. I, which will be short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more questions selecting one question from each unit.

UNIT	TOPICS	CONTACT HOURS
I	Introduction Introduction to Parasitology; Brief introduction of Parasitism, Parasite, Parasitoid and Vectors (mechanical and biological vector) Host parasite relationship	12
II	Parasitic Protists: Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment of <i>Entamoeba histolytica</i> , <i>Giardia intestinalis</i>	11
III	Parasitic Platyhelminthes: Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment of <i>Fasciolopsis buski</i> , <i>Schistosoma haematobium</i> , Parasitic Nematodes: Study of Morphology, Life Cycle, Prevalence, Epidemiology, Pathogenicity, Diagnosis, Prophylaxis and Treatment of <i>Ancylostoma duodenale</i> , Study of structure, life cycle and importance of <i>Meloidogyne</i> (root knot nematode)	11
IV	Parasitic Arthropoda: Biology, importance and control of ticks, mites, <i>Pediculus humanus</i> (head and body louse), Parasitic Vertebrates; A brief account of parasitic vertebrates; <i>Cookcuttershark</i> , Hood Mockingbird and Vampire bat	11

3/7/25
3/7/25

V Practical	1. Study of life stages of <i>Entamoeba histolytica</i>, <i>Giardia intestinalis</i> through permanent slides/micro photographs 2. Study of adult and life stages of <i>Fasciola psisbuski</i> and <i>Schistosoma mahaematobium</i> through permanent slides/micro photographs 3. Study of adult and life stages of <i>Ancylostoma duodenale</i> through permanent slides/micro photographs 4. Study of plant parasitic root knot nematode, <i>Meloidogyne</i> from the soil sample 5. Study of <i>Pediculus humanus</i> (Head louse and body louse) through permanent slides/ photographs. 6. Submission of a brief report on parasitic vertebrates	30

ZOOLOGY: SEMESTER-6

Remarks	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Scheme A, B & C	CC-6 MCC-11 4 credit	24UN-ZOO-601	Developmental Biology & Evolution	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.
Level of the course: 200-299									
Pre-requisite for the course (if any): Biology as a Subject at 4.0 Level (Class XII)									
Course Learning Outcomes (CLO) 1. Students will be able to describe origin of life and theories of evolution. 2. Students will be able to describe concept of speciation and evolution of horse and man. 3. Students will be able to describe different stages during fertilization. 4. Students will be able to describe the different stages in the development of chick and frog. 5. Students will be able to describe to understand how evolution and development leads to a sustainable life in species.									
Instructions for Paper-Setter 1. Nine questions will be set in all. All questions will carry equal marks. 2. Question No. I, which will be short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more questions selecting one question from each unit.									
UNIT	TOPICS								CONTACT HOURS
I	Historical perspectives, aims and scope of developmental biology. Human Fertilization- Generalized structure of mammalian ovum & sperm, spermatogenesis and Oogenesis, fertilization, parthenogenesis, different types of eggs and patterns of cleavage. Blastulation of Frog and Chick- Process of blastulation and fate-map construction in frog and chick.								12
II	Gastrulation in Frog and Chick- Gastrulation in frog and chick upto the formation of three germinal layers. Elementary knowledge of primary organizers and extra embryonic membranes. Placenta: types; structure and function of placenta in humans. Concepts of competence, determination and differentiation. Concept of regeneration.								11
III	Origin of life: Concept and evidences of organic evolution. Theories of organic evolution. Concept of micro, macro-and mega-evolution. Evidences of Evolution: Fossil record- types of fossils, geological time scale, Natural selection. Isolating mechanisms, modes of speciation—allopatric, sympatric, Adaptive radiation								11
IV	Population genetics: Hardy-Weinberg Law Concept of species: Different species concept and speciation. Genetic Drift (mechanism, founder's effect, bottleneck phenomenon; Role of Migration and Mutation in changing allele frequencies Phylogeny of horse, Evolution of man.								11
V Practical	1. Preparation of permanent/temporary slides of developmental stages of frog/mosquito. 2. Study of Life History of Frog. 3. Study of permanent slides of W M of chick embryo (13-18h, 24-36h, 36-48h, 48-72h). 4. Window preparation and identification of stages of development in chick egg. 5. Histology: Preparation and study of permanent histological slides of testis, ovary, kidney, intestine, liver of rat (H & E staining)								30

ZOOLOGY: SEMESTER-6

Remarks	Course Type	Course Code	Name of the Course	Credit	Contact Hours/ Week	Internal Assessment marks	End Term Marks	Max. Marks	Exam Duration
Scheme B & C	MCC-12 4 credit	24UN-ZOO-602	Basics of Endocrinology and Immunology	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.

Level of the course: 200-299

Pre-requisite for the course (if any): Biology as a Subject at 4.0 Level (Class XII)

Course Learning Outcomes (CLO): Students will be able to

1. Develop an in-depth comprehensive knowledge of endocrinology from a physiological, cellular and molecular perspective.
2. This course will make students understand the basic structure and chemical organization of hormones and various signaling molecules.
3. The students will how the immune system can fight infection and other diseases
4. Students will able to understand the concept of vaccines and its cons and pros.
5. The student will get practical knowledge of basic structure and function of hormones and Immune system.

Instructions for Paper-Setter

1. Nine questions will be set in all. All questions will carry equal marks.
2. Question No.1, which will be short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise. Selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more questions selecting one question from each unit.

UNIT	TOPICS	CONTACT HOURS
I	Introduction to hormone History of endocrinology, Classification and Characteristic, pituitary gland and its general physiological action: Adenohypophysis hormone (somatotropin and prolactin), Glycoprotein hormones (FSH, LH and TSH), Neurohypophysis hormone (oxytocin and vasopressin, urotensin), physiological role of adrenal hormone, Thyroid hormone action in poikilotherms And homeotherms.	12
II	Hormone Action and applications Membrane and nuclear receptor hormones (regulation and signal transduction) Permissive actions of hormones and termination of hormone action. Endocrine feedback to stimuli. Hormone and human health: Production of hormones as pharmaceuticals, Genetic analysis of Hormonal disorders. Hormones on IVF, Pregnancy testing and Amniocentesis.	11
III	Overview of Immune System Introduction to basic concepts in immunology, Components of immune system of Innate and Adaptive Immunity, Cells and organs of immune system (primary and secondary organs), Basic properties of antigen B and T cell epitopes, Adjuvants and haptens, structure, classes and functions of antibodies and interaction as tools for research hand diagnosis.	11
IV	Working of immune system Structure and functions of MHC molecules. Basic properties and functions of cytokines, Complement system (component and pathways), Introduction to concept of autoimmunity (Rheumatoid Arthritis and tolerance, AIDS). General introduction to Vaccines with its Function in biological sciences.	11

3 days
31/7/25
31/7/25

V Practical	1. Study of the permanent slides of all the endocrine glands 2. Histological study of lymphoid organs spleen, thymus and lymph nodes through slides/ photographs	30
----------------	---	----

	3. Preparation of stained blood film to study various types of blood cells. 4. Ouchterlony's double immuno-diffusion method. 5. ABO blood group determination. 6. Demonstration of the following: a. ELISA b. Immuno electrophoresis 7. Immunological diagnosis of pregnancy. 8. Qualitative test for the presence of sugar in urine.

Scheme B & C	DSE-4 4 credit Select one Option	24UN-ZOO-603	Reproductive Physiology	3	3	20	50	70	3 hrs.
			Practical	1	2	10	20	30	4 hrs.

Level of the course: 200-299

Pre-requisite for the course (if any): Biology as a Subject at 4.0 Level (Class XII)

Course Learning Outcomes (CLO): A student is able to learn about

1. The cellular, molecular and biochemical changes in reproductive physiology
2. The basic and molecular concepts of sperm at oogenesis folliculogenesis, ovulation, follicular atresia and germline-soma interaction.
3. The importance of diet, exercise, stress and yoga during ageing
4. Various problems of male sterility and female infertility.
5. To give knowledge of animals reproduction to deal with reproduction and fertility problems in animals and humans.

Instructions for Paper-Setter

1. Nine questions will be set in all. All questions will carry equal marks.
2. Question No. I, which will be short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more questions selecting one question from each unit.

UNIT	TOPICS	CONTACT HOURS
I	Reproductive Endocrinology Introduction to gonadal hormones and mechanism of hormone action, basic mechanism of mode of action of steroid hormones, glycoprotein hormones, and prostaglandins, hypothalamo-hypophyseal – gonadal axis, regulation of gonadotrophin secretion in male and female. Mechanism of sex differentiation.	12
II	Functional anatomy of male reproduction Outline and architecture of male reproductive system in mammals, spermatogonia, biology of spermatozoa, seminiferous epithelial cycle, spermatogenesis, hormonal control of spermatogenesis, Biochemistry of semen, semen analysis and its utility in medico legal cases.	11
III	Functional anatomy of female reproduction Outline and histological of female reproductive system in mammals, Reproductive cycles in mammals and their regulation: ovulation, implantation (its type, sequential events during implantation, delayed implantation), Pregnancy: corpus luteum, hormonal control of pregnancy, Parturition: activation and stimulation of uterus, Hormonal meditation; Lactation, morphological and functional development of mammary glands, maintenance of lactation, Milk secretion, Menopause.	11
IV	Reproductive Health Infertility in male and female: causes, diagnosis and management; Assisted Reproductive Technology: sex selection, sperm banks, frozen embryos, in vitro fertilization, ET, EFT, IUT, ZIFT, GIFT, ICSI, PROST; Modern contraceptive technologies; Demographic terminology used in family planning	11

3 years
3/7/25
3/7/25

V Practical	1. Study of animal house: set up and maintenance of animal house, breeding techniques, care of normal and experimental animals. 2. Examination of vaginal smear rats from live animals.	30
	3. Demonstration of Surgical techniques: principles of surgery in endocrinology. Ovaryectomy, hysterectomy, castration and vasectomy in rats. 4. Examination of histological sections from photomicrographs/ permanent slides of rat/human: testis, epididymis and accessory glands of male reproductive systems; Sections of ovary, fallopian tube, uterus (proliferative and secretory stages), cervix and vagina 5. Sperm count and sperm motility in rat 6. Study of modern contraceptive devices 7. Demonstration of male and female reproductive systems of mammals by photograph/online videos.

			Practical	1	2	10	20	30	4 hrs.

Level of the course: 200-299

Pre-requisite for the course (if any): Biology as a Subject at 4.0 Level (Class XII)

Course Learning Outcomes (CLO): Students will be able to understand

1. Molecular Biology which chiefly deals with interactions among various systems of the cell, including those between DNA and RNA and learning how these are regulated
2. The Concept of gene, gene cistron relationship in prokaryotes and eukaryotes
3. DNA regulation and replication; Types of DNA damage, DNA repair pathways Transcription in prokaryotes
4. The process of Reverse transcription; Repeated sequences; Transposons types and transposition mechanism
5. The concept of qualitative and quantitative estimation of nucleic acid by designing and implementing experimental procedures using relevant techniques

Instructions for Paper-Setter

1. Nine questions will be set in all. All questions will carry equal marks.
2. Question No.1, which will be short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more questions selecting one question from each unit.

UNIT	TOPICS	CONTACT HOURS
I	Nucleic Acids: Salient features of DNA and RNA, Watson and Crick model of DNA DNA Replication: DNA Replication in prokaryotes and eukaryotes, mechanism of DNA replication, Semi-conservative, bidirectional and semi-discontinuous replication	12
II	Transcription: RNA polymerase and transcription Unit, mechanism of transcription in prokaryotes and eukaryotes, transcription factors Translation: Genetic code, Degeneracy of the genetic code and Wobble Hypothesis; Process of protein synthesis in prokaryotes: Ribosome structure and assembly in prokaryotes, fidelity Of protein synthesis, Difference between prokaryotic and eukaryotic translation	11
III	Post Transcriptional Modifications and Processing of Eukaryotic RNA: Concept of introns and exons, splicing mechanism, alternative splicing, exon shuffling, and RNA editing, Processing of t RNA Gene Regulation: Transcription regulation in prokaryotes: Principles of transcriptional regulation with examples from lac operon and trp operon; Transcription regulation in eukaryotes: Activators, repressors, enhancers, silencer elements; Gene silencing, Genetic imprinting	11
IV	DNA Repair Mechanisms: Pyrimidine dimerization and mismatch repair. Regulatory RNAs: RNA interference, miRNA, siRNA	11

			Practical	1	2	10	20	30	4 hrs.

Level of the course: 200-299

Pre-requisite for the course (if any): Biology as a Subject at 4.0 Level (Class XII)

Course Learning Outcomes (CLO): The students will be able to know

1. The significance of biological and serological evidence
2. The importance of biological fluids– blood, urine, semen, saliva, sweat and milk– in crime investigations
3. The Enhance the knowledge about wildlife forensics aid in conserving natural resources
4. The Enhance the knowledge of forensic entomology assists in death investigations
5. About practical applications of forensic biology.

Instructions for Paper-Setter

1. Nine questions will be set in all. All questions will carry equal marks.
2. Question No. 1, which will be short answer type covering the entire syllabus, will be compulsory. The remaining eight questions will be set unit wise selecting two questions from each Unit I to IV. The candidate will be required to attempt question No. 1 and four more questions selecting one question from each unit.

UNIT	TOPICS	CONTACT HOURS
I	Biological Evidence Nature and importance of biological evidence. Composition and Functions of Blood and Semen. Significance of hair evidence. Transfer, persistence and recovery of hair evidence. Structure of human hair. Types and identification of microbial organisms of forensic significance. Identification of Blood, Semen, Saliva and Urine through preliminary and confirmatory crystal examinations.	12
II	Forensic Botany Identification of wood, leaves, pollens and juices as botanical evidence. Diatoms and their forensic significance.	11
III	Wildlife Forensics Fundament also wildlife forensic. Significance of wildlife forensic. Protected and endangered species of animals and plants. Illegal trading in wildlife items, such as skin, fur, bone, horn, teeth, flowers and plants. Identification of physical evidence pertaining to wildlife forensics. Identification of pugmarks of various animals.	11
IV	Forensic Entomology Basics of forensic entomology. Insects of forensic importance. Collection of entomological evidence during death investigations.	11
